Senior Materials Engineer (Ph.D.)

2026-2354

About Exponent

Exponent is the only premium engineering and scientific consulting firm with the depth and breadth of expertise to solve our clients' most profoundly unique, unprecedented, and urgent challenges.

Our vision is to engage multidisciplinary teams of science, engineering, and regulatory experts to empower clients with solutions that create a safer, healthier, more sustainable world. For over five decades, we've connected the lessons of past failures with tomorrow's solutions to advise clients as they innovate technologically complex products and processes, ensure the safety and health of their users, and address the challenges of sustainability.

Join our team of experts with degrees from top programs at over 500 universities and extensive experience spanning a variety of industries. At Exponent, you'll contribute to the diverse pool of ideas, talents, backgrounds, and experiences that drives our collaborative teamwork and breakthrough insights. Plus, we help you grow your career through mentoring and a culture of learning. Thanks for your interest in joining our team!

Key statistics:

- 950+ Consultants
- 640+ Ph.D.s
- 90+ Disciplines
- 30+ Offices globally

Our Opportunity

We are currently seeking a **Senior Materials Engineer (Ph.D.)** for our **Materials Science and Electrochemistry** Practice in **Denver, CO**. In this role, you will work as part of a team conducting materials engineering and scientific analyses to assist Exponent's clients across multiple industries, particularly including consumer products and construction materials. Projects can range from failure investigation of materials issues with products/components in the field or during development to materials selection and reliability behavior, applying fundamental materials engineering principles. With the support of all of Exponent's diverse expertise in polymers, materials chemistry, metallurgy, and mechanical engineering, to name a few, we touch on nearly every aspect of our clients' products.

You will be responsible for

- Conducting failure analysis of glass and ceramics, composites, metals, polymers
- Performing materials characterization and fracture analysis
- Designing and executing laboratory experiments and field inspections

- Collaborating with multidisciplinary teams on investigations and product evaluations

You will have the following skills and qualifications

- Ph.D. and Bachelors in Materials Science and Engineering or a related field
- Strong understanding of ceramic material (including glass), fracture, and degradation mechanisms
- Experience with materials characterization techniques (e.g., SEM, TEM, EDS, XPS, FTIR, XRD,)
- Ability to adapt expertise to new industries and work outside core areas
- Demonstrated problem-solving skills and ability to contribute proactively in team settings
- Familiarity with failure analysis methodologies and root cause investigations
- Excellent verbal and written communication skills for technical and client-facing reports
- The ideal candidate demonstrates a proactive approach to their work, anticipates challenges, and takes ownership of projects

Applicants are encouraged to submit a CV (Curriculum Vitae) with publications (feel free to include publications that are in review or pending) [not restricted to 1 page].

Life @ Exponent

<https://www.exponent.com/company/our-impact>

Attracting, inspiring, developing, and rewarding exceptional people with diverse backgrounds and expertise are central to our corporate culture. Our diverse team allows us to provide better value to our clients and enjoy an enriched work environment.

Our firm is committed to offering a variety of programs and resources to support health and well-being. We believe that providing competitive benefits as well as compensation and recognition programs empowers our staff to do work that makes a difference.

Work Environment

At Exponent, we have found that in-person interactions deepen employee engagement and are crucial for development, for realizing the full potential of our talented and diverse teams, and for building a more inclusive workplace where all have a sense of belonging. In our offices, you can expect a supportive culture and a collaborative, dynamic, multi-disciplinary work environment. Our consultants engage in-person in the office unless they are traveling for client work or other business activities.

We value the rich lives our colleagues enjoy outside of work and understand that work/life balance

conferences, and make time for priorities outside of work, too. It is this flexible, agile work style and working hours that allow our teams to drive innovation and results in their own ways, while meeting the needs of clients. #LI-Onsite

Compensation

Our consultants are rewarded for their technical and business contributions and have an opportunity to plan for future success and career growth. Exponent's total compensation plan is consistent with its expectations of the quality and quantity of work performed and with the professional standards set by Exponent. At the Associate and Senior Associate level, total compensation includes base salary, bi-weekly bonuses for high-intensity efforts, annual bonus and 401(k) employer contribution of 7% of base salary.

The base salary range for this position is dependent on experience and capabilities which will be assessed during the interview process.

Salary Range

USD \$145,000.00 - USD \$176,000.00 /Yr.

Benefits you will enjoy
